

Welcome to the NEW and IMPROVED Internet Banking.

The South African Bank of Athens is proud to confirm the launch of our new Internet Banking platform, designed specifically for South African SME businesses. Our new system provides a modern and intuitive user experience aimed at making your electronic banking simpler and safer.

We have focused on increased security features, improved usability and the layers of approval, authorisation and access that a business user needs, to operate their accounts effectively. Although designed with businesses in mind, we have also ensured that the new system is equally user-friendly and effective for the individual user.

Some of the New Internet Banking features will include:

- Email your statements to yourself
- Export your statement into Excel
- Multiple Payments – lets you pay multiple beneficiaries simultaneously
- Group Payments – lets you group beneficiaries together so that they can be paid simultaneously
- Recurring Payments – set up a recurring payment to a beneficiary
- Once-off Payments – make a payment without having to create a beneficiary first
- More options around Beneficiary and Payment Approvals
- SMS and email notifications
